SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

General Information & Significant Accounting Policies

1. General information

ITNL Offshore Pte Ltd (the Company) (Registration 201134421C) is a limited company incorporated in the Republic of Singapore with principal place of business at 78 Shenton Way, Level 29-03, Singapore 079120 and its registered office at 8, Marina Boulevard, #05-02 Marina Bay Financial Centre, Singapore 018981. Its parent and ultimate holding company is IL&FS Transportation Networks Limited and Infrastructure Leasing & Financial Services Limited respectively.

The principal activity of the Company is that of investment holding.

Since major source of refinancing is provided by one of related party which is directly or indirectly guaranteed by immediate parent company, the directors are of the view that there are no significant concerns on the long term viability of the Company and any required financial support will be obtained from its immediate and ultimate parent company. Accordingly, there is no material uncertainty on the ability of the Company to continue as a going concern and hence, these financial statements have been prepared on a going concern basis.

The Company is assured of continuing operational and financial support from its parent company, vide its letter dated April 20, 2017 which is effective for the period of 12 months.

The financial statements of the Company for the financial year ended March 31, 2017 were authorized for issue by the Board of Directors on May 26, 2017

2. Significant accounting policies

2.1 Statement of compliance

The financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015.

Upto the year ended March 31, 2016, the Company prepared its financial statements in accordance with accounting standards notified under the section 133 of the Companies Act 2013. These are Company's first Ind AS financial statements. The date of transition to Ind AS is April 1, 2015. Refer Note 2.14 for the details of first-time adoption exemptions availed by the Company.

2.2 Basis of preparation and presentation

The financial statements have been prepared on a historical cost basis, except as disclosed in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on this basis, except for measurements that have some similarities to fair value but are not fair value, such as value in use.

The principal accounting policies are set out below.

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

Fair value measurement

The Company measures financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting year.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Disclosures for valuation methods, significant estimates and assumptions
- Contingent consideration
- Quantitative disclosures of fair value measurement hierarchy (note no.3)
- Financial instruments (including those carried at amortised cost) (note no.21)

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

2.3 Foreign currencies

The Company's financial statements are presented in INR, which is also the parent company's functional currency.

In preparing the financial statements, transactions in currencies other than the Company's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting year, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

Exchange differences on monetary items are recognised in profit or loss in the year in which they arise except for.

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- exchange differences on transactions entered into in order to hedge certain foreign currency risks are recognised in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss.
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on repayment of the monetary items.
- Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

2.4 Borrowing costs

Borrowing costs are recognised in the year to which they relate, regardless of how the funds have been utilised. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. All other borrowing costs including guarantee commission, are recognised in profit or loss in the period in which they are incurred.

2.5 Taxation

2.5.1 Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted at the end of the reporting period.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax return with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

2.5.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets (including unused tax credit and unused tax losses such as carried forward business loss and unabsorbed depreciation) are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off deferred tax assets against deferred tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.6 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

2.7 REVENUE RECOGNITION

Revenue is measured at the fair value of the consideration received or receivable

2.8 Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

2.9 Financial instruments

Financial assets and financial liabilities are recognised when a company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss ("FVTPL") are recognised immediately in the statement of profit and loss.

2.10 Financial assets

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

2.10.1 Classification of financial assets – debt instruments

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows;
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

2.10.2 Amortised cost and Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial instruments and of allocating interest income or expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial instruments, or, where appropriate, a shorter period.

2.10.3 Loans and receivables

Other receivables and loans to a fellow subsidiary that have fixed or determinable payments that are not quoted in an active market are classified as "loans and receivables". Loans and receivables are measured at amortised cost using the effective interest method less impairment. Interest is recognised by applying the

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

effective interest method, except for short-term receivables when the effect of discounting is immaterial.

2.10.4 Financial assets at FVTPL

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in FVOCI for equity instruments which are not held for trading.

Debt instruments that do not meet the amortised cost or FVOCI criteria are measured at FVTPL. In addition, debt instruments that meet the amortised cost or FVOCI criteria but are designated as at FVTPL are measured at FVTPL.

A debt instrument that meets the amortised cost or FVOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. [The Company has not designated any debt instrument as at FVTPL.]

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in profit or loss. The net gain or loss recognised in profit or loss is included in the "Other income" line item.

2.10.5 Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- b) Lease receivables under Ind AS 17
- c) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18 (referred to as 'contractual revenue receivables' in these illustrative financial statements)
- d) Loan commitments which are not measured as at FVTPL
- e) Financial guarantee contracts which are not measured as at FVTPL

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses.

However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realized upto one year from the date of the invoice, loss for the time value of money is not recognised, since the same is not considered to be material.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting year following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.10.6 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralized borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g., when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

2.10.7 Foreign Exchange Gain and Losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting year.

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

- For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss except for those which are designated as hedging instruments in a hedging relationship.
- Changes in the carrying amount of investments in equity instruments at FVOCI relating to changes in foreign currency rates are recognised in other comprehensive income.

2.10.8 Modification of Cash Flows of financial assets and revision in estimates of Cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with Ind AS 109, the Company recalculates the gross carrying amount of the financial asset and recognises a modification gain or loss in profit or loss. The gross carrying amount of the financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate. Any costs or fees incurred are adjusted to the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If the Company revises its estimates of payments or receipts (excluding modifications and changes in estimates of expected credit losses), it adjusts the gross carrying amount of the financial asset or amortised cost of a financial liability to reflect actual and revised estimated contractual cash flows. The Company recalculates the gross carrying amount of the financial asset or amortised cost of the financial liability as the present value of the estimated future contractual cash flows that are discounted at the financial instrument's original effective interest rate. The adjustment is recognised in profit or loss as income or expense.

2.11 Financial liabilities and equity instruments-

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

2.11.1 Classification as debt or equity

Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.11.2 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL. However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Company and commitments issued by the Company to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below.

2.11.2.1 Financial liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting years. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant year. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter year, to the net carrying amount on initial recognition.

2.11.2.2 Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms

Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 18.

2.11.2.3 Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting year, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in 'Other income' in the line-item 'Net foreign exchange gains/(losses)'.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting year.

2.11.2.4 Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

2.11.2.5 Commitments to provide a loan at a below-market interest rate

Commitments to provide a loan at a below-market interest rate are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 18.

2.12 Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps. Further details of derivative financial instruments are disclosed in Note 21.9.

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedging relationship and the nature of the hedged item. Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting.

2.13 Cash flow hedges

The effective portion of changes in the fair value of the designated portion of derivatives that qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'Other gains and losses' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity relating to effective portion as described above are reclassified to profit or loss in the years when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, such gains and losses are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

2.14 First-time adoption optional exemptions

2.14.1 Overall principle

The Company has prepared the opening balance sheet as per Ind AS as of April 1, 2015 (the transition date) by recognizing all assets and liabilities whose recognition is required by Ind AS, not recognizing items of assets or liabilities which are not permitted by Ind AS, by reclassifying items from previous GAAP to Ind AS as required

under Ind AS, and applying Ind AS in measurement of recognised assets and liabilities. However, this principle is subject to the certain exception and certain optional exemptions availed by the Company as detailed below.

2.14.2 Derecognition of financial assets and financial liabilities

The Company has applied the derecognition requirements of financial assets and financial liabilities prospectively for transactions occurring on or after April 1, 2015 (the transition date).

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

2.14.3 Classification of debt instruments

The Company has determined the classification of debt instruments in terms of whether they meet the amortized cost criteria or the FVOCI criteria based on the facts and circumstances that existed as of the transition date.

2.14.4 Impairment of financial assets

The Company has applied the impairment requirements of Ind AS 109 retrospectively; however, as permitted by Ind AS 101, it has used reasonable and supportable information that is available without undue cost or effort to determine the credit risk at the date that financial instruments were initially recognised in order to compare it with the credit risk at the transition date. Further, the Company has not undertaken an exhaustive search for information when determining, at the date of transition to Ind ASs, whether there have been significant increases in credit risk since initial recognition, as permitted by Ind AS 101.

2.14.5 Foreign Currency Monetary items

The Company had exercised the option of amortising / capitalizing the exchange differences arising on long-term foreign currency monetary items as given under Ministry of Corporate Affairs (MCA) Notification No. G.S.R 914(E) dated December 29, 2011.

3. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in Note 2, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

3.1 Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations (see below), that management has made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

3.1.1 Determination of functional currency

The determination of the Company's functional currency often requires significant judgement where the primary economic environment in which the Company operates and the currency that mainly influence the underlying transactions, events and conditions that are relevant to the Company may not be clear. Accordingly, management determines that the most appropriate functional currency is the United States dollar, as it is the currency that most faithfully represents the economic effect of the underlying transactions, events, and conditions of the Company.

3.2 Key sources of estimation uncertainty

The key assumptions made concerning the future and other key sources of estimation uncertainty at the end of the reporting year that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year is discussed below:

SPECIAL PURPOSE FINANCIAL STATEMENTS

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

Determination of impairment losses on loans to a fellow subsidiary

In estimating the impairment loss on the loans to a fellow subsidiary, the management takes into consideration whether there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the loans to a fellow subsidiary, the estimated future cash flows of the loans to a fellow subsidiary have been impacted; and determine the amount of the impairment as the difference between the carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The use of different indicators and/or estimation methodologies may have a material effect on amount of the impairment loss recognised. Accordingly, the management is of the view that as at the end of the reporting year, there were no objective evidence that loan to a fellow subsidiary is impaired.

4. Loans

4A Loans - Non Current

Particulars	As at March 31, 2017	As at March 31, 2016	Equivalent ₹
			As at April 1, 2015
Loans to related parties (Refer note 22 (e) / (f))

-Secured, considered good			
-Unsecured, considered good (refer foot note below)	7,188,158,659	-	-
Total	7,188,158,659	-	-

Foot Note :

The loan to IIPL is unsecured, carries a fixed interest rate of 8% per annum. The loan matures in January 2018.

The Company had issued Bond of CNY 630 million on April 17, 2012. Out of its bond proceeds, the Company had granted a long term loan of US\$ 89 million to ITNL International Pte Ltd (IIPL) in 2012.

IIPL has issued the Bonds, wherein the Bond holders through the Offering Memorandum have restricted IIPL from making any payment to the Company in respect of the aforesaid loan during the existence of the Bond liability.

In order to give effect to the aforesaid provision of the Bond Holders, IIPL entered into an agreement with the Company dated July 18, 2014 wherein the Interest rate on the aforesaid loan was fixed at 8% p.a (inclusive of all expenses) w.e.f July 14, 2014 and the principal has been now agreed to be repaid on January 2018 bullet. Hence the maturity date of the loan to IIPL is now revised to January 2018 and thereafter renewable on mutually agreeable terms.

The above financial asset is carried at amortised cost.

5. Other financial assets - Current

Total	6,224,505,600	6,367,958,400	-			

*QT = Quarterly, Y = Yearly and B = Bullet repayment

The Terms of Borrowings are as under:

Loan Type : Unsecured
Start Date : 13th April 2015
Rate of Interest : 7.35% per annum, reset at every six months
Interest Payment : 3 Monthly
Terms of Repayment : 3 years bullet repayment
Maturity Date : 12th April 2018

The Company had issued bonds of RMB 630,000,000 on April 27, 2012. The bonds carried a fixed coupon rate of 5.75% per annum payable semi annually. The bonds were issued for a term of 3 years and were listed on the Hong Kong Stock Exchange. The bonds were guaranteed by the Export Import Bank of India and counter guarantee given by ITNL.

During the year ended March 15, ITNL, the holding company had incorporated a new subsidiary in Singapore, ITNL Offshore Two Pte Ltd. ("IOTPL"), wherein a bond issue of US\$ 111.15 million (RMB 690 million) was raised on March 25, 2015. During the year ended March 16, the Company had obtained a loan from IOTPL on April 13, 2015 and out of the proceeds the Company had fully settled the above bond principal and interest on April 26, 2015.

The earnings and weighted average number of equity shares used in the calculation of basic earnings per share are as follows.

Particulars	Year ended March 31, 2017	Year ended March 31, 2016
Profit/(Loss) for the year attributable to owners of the Company (A)	5,479,932	(65,443,490)
Weighted average number of equity shares for the purposes of basic earnings per share (B)	3,370,500	3,370,500
Basic Earnings per share (A/B)	2	(19)

20.2 Diluted earnings per share

The earnings used in the calculation of diluted earnings per share are as follows.

The weighted average number of equity shares for the purpose of diluted earnings per share reconciles to the weighted average number of equity shares used in the calculation of basic earnings per share as follows:

Particulars	Year ended March 31, 2017	Year ended March 31, 2016
Earnings used in the calculation of basic earnings per share	5,479,932	(65,443,490)
Earnings used in the calculation of diluted earnings per share (A)	5,479,932	(65,443,490)
Weighted average number of equity shares used in the calculation of basic earnings per share	3,370,500	3,370,500
Weighted average number of equity shares used in the calculation of diluted earnings per share (B)	3,370,500	3,370,500
Diluted earnings per share (A/B)	2	(19)

ITNL OFFSHORE PTE. LTD., SINGAPORE

Notes forming part of the Special Purpose Financial Statements for the year ended March 31, 2017

21. Financial instruments**21.1 Capital management**

The Company reviews its capital structure at least annually to ensure that it will be able to continue as a going concern

The capital structure of the Company comprises of share capital, debt, which includes borrowing disclosed in Note 10 & 11 and accumulated losses. There are no capital requirements imposed externally on the Company.

21.1.1 Gearing ratio

The gearing ratio at end of the reporting year was as follows.

Particulars	Equivalent ₹		
	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015
Debt (i)	7,125,720,254	6,821,897,917	6,554,306,275
Cash and bank balances	10,779,040	14,019,199	439,378,651
Net debt	7,114,941,214	6,807,878,718	6,114,927,624
Equity (ii)	68,676,715	64,839,926	32,540,127
Net debt to equity ratio	104	105	188

Debt is defined as long- and short-term borrowings (excluding derivative, financial guarantee contracts and contingent consideration), as described in notes 10, and 11.

Equity includes all capital and reserves of the Company that are managed as capital.

21.2 Categories of financial instruments

Particulars	Equivalent ₹		
	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015
Financial assets			
Cash and bank balances	10,779,040	14,019,199	439,378,651
Loans	7,188,158,659	6,882,575,605	6,090,328,193
Other financial assets	-	-	80,315,017
Financial liabilities			
Borrowings	6,224,505,600	6,367,958,400	6,425,790,158
Trade payable	4,173,859	9,856,961	56,132,243
Other financial liabilities	901,214,654	453,939,517	128,516,117

21.3 Financial risk management objectives

The Company has documented financial risk management policies. These policies set out the Company's overall business strategies and its risk management philosophy. The Company's overall financial risk management programme seeks to minimise potential adverse effects of financial performance of the Company. The Board of Directors provides written principles for overall financial risk management and written policies covering specific areas, such as market risk (including foreign exchange risk and interest rate risk), credit risk, liquidity risk and investing excess cash.

The Company does not hold or issue derivative financial instruments for speculative purposes.

There has been no change to the Company's exposure to these financial risks or the manner in which it manages and measures the risk.

21.4 Foreign currency risk management

Foreign currency risk refers to the risk that changes in foreign exchange rates would have an adverse impact on the fair value or future cash flows of the Company's financial instruments. The Company has expenses denominated in Singapore Dollars, Chinese Yuan and Indian Rupees, and therefore is exposed to foreign currency risks.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting year are as follows.

Particulars	Liabilities as at			Assets as at		
	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015
Chinese Yuan		-	-		-	184,592,680
Singapore Dollar	366,871	-	2,907,959			
Indian Rupees	2,255,087	2,307,058	49,523,155			

21.4.1 Foreign currency sensitivity analysis

The Company is mainly exposed to the currency of China, Singapore & India

The following table details the sensitivity to a 10% increase and decrease in the relevant foreign currencies against the functional currency of the Company. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currencies denominated monetary items and adjusts their translation at the end of the financial year for a 10% change in foreign currency rates. If the relevant foreign currencies weaken by 10% against the functional currency of the Company, profit or loss will increase/(decrease) by

Particulars	Currency Chinese Yuan Impact			Currency Singapore Dollar Impact			Currency Indian Rupees Impact		
	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015
Profit or (loss)	-	-	18,459,268	(36,687)	-	(290,796)	(225,509)	(230,706)	(4,952,316)

(i) This is mainly attributable to the exposure outstanding on Currency CNY, SGD & INR

(ii) This is as a result of the changes in SGD, CNY & INR

(iii) This is mainly attributable to the exposure to outstanding Currency CNY, SGD & INR

(iv) This is mainly as a result of CNY, SGD & INR

A 10% strengthening of the relevant foreign currencies against the functional currency of the Company at the reporting date would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

21.5 Interest rate risk management

Interest rate risk refers to the risk that changes in market interest rates would have an adverse impact on the fair value or future cash flows of the Company's financial instruments. The Company does not have significant exposure to interest rate risk at the end of the reporting year as its interest-bearing instruments carry a fixed rate

21.6 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Company

The credit risk on cash and bank balances is limited because the counterparties are banks with high credit rating assigned by international credit-rating agencies

The credit risk associated with loans due from a fellow subsidiary and other financial assets is not considered an undue exposure and management manages and monitors these exposures to ensure appropriate measures are implemented in a timely and effective manner.

The carrying amount of financial assets recorded in the statement of financial position represents the Company's maximum exposure to credit risk.

21.7 Liquidity risk management

Liquidity risk refers to the risk of difficulties in meeting payment obligations. In the management of its liquidity risk, the Company monitors and maintains a level of cash and cash equivalents deemed adequate by management to finance the Company's operations and mitigate the effects of fluctuations in cash flows. Liquidity risk is managed by matching the payment and receipt cycle. The Company's operations are financed mainly through equity and cash flows from operations.

21.7.1 Liquidity and interest risk tables

The following tables detail the remaining contractual maturity for non-derivative financial liabilities and the expected realisation for financial assets. The inclusion of information on financial assets is necessary in order to understand the Company's liquidity risk management which is managed on a net asset and liability basis. The table has been drawn up based on the undiscounted cash flows of financial instruments which include both interest and principal cash flows

Particulars	March 31, 2017		March 31, 2016		April 1, 2015	
	Non-interest bearing	Fixed interest rate instruments	Non-interest bearing	Fixed interest rate instruments	Non-interest bearing	Fixed interest rate instruments
Weighted average effective interest rate (%)		7.35%		7.35%		4.80%
Upto 1 year	4,173,859	1,358,715,816	9,856,961	921,984,459	56,132,243	6,554,306,275
1 to 3 years		6,240,800,162		6,852,673,436		
3 to 5 years						
More than 5 years						
Total	4,173,859	7,599,515,978	9,856,961	7,774,657,895	56,132,243	6,554,306,275
Carrying value	4,173,859	7,125,720,254	9,856,961	6,821,897,917	56,132,243	6,554,306,275

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Particulars	March 31, 2017		March 31, 2016		April 1, 2015	
	Non-interest bearing	Fixed interest rate instruments	Non-interest bearing	Fixed interest rate instruments	Non-interest bearing	Fixed interest rate
Weighted average effective interest rate (%)		6.89%		6.89%		6.89%
Upto 1 year	10,779,040	7,552,420,137	14,019,199	472,290,248	519,693,668	445,646,496
1 to 3 years		-		7,255,232,020		6,888,829,038
3 to 5 years						
More than 5 years						
Total	10,779,040	7,552,420,137	14,019,199	7,727,522,268	519,693,668	7,334,475,534
Carrying value	10,779,040	7,188,158,659	14,019,199	6,882,575,605	519,693,668	6,090,328,193

21.8 Fair values of financial assets and financial liabilities

Fair value of the Company's financial assets and financial liabilities that are not measured at fair value on a recurring basis (but fair value disclosure are required)

Management considers that the carrying amounts of:

- Loan to a fellow subsidiary and borrowings to approximate their fair values as there were no material changes in the market interest rate at the transaction date and at year end.
- Other financial assets and financial liabilities recorded at amortised cost in the financial statements approximate their fair values due to relative short term maturity of these financial instruments.

21.9 Fair value of the Company's financial assets and financial liabilities that are measured at fair value on a recurring basis

The Company's investment at FVTPL is measured at fair value at the end of each reporting year. The following table gives information about how the fair value is determined (in particular, the valuation technique(s) and inputs used).

Financial assets	Fair value			Fair value hierarchy	Valuation technique(s) and key input(s)
	As at March 31, 2017	As at March 31, 2016	As at April 1, 2015		
	US\$	US\$	US\$		
Derivative financial instruments - Cross Currency Interest rate swaps	-	-	80,315,017	Level 2	Discounted cash flow. Future cash flows are estimated based on forward interest and exchange rates (from observable yield curves and forward exchange rates at the end of the reporting year) and contract forward, interest rates, discounted at a rate that reflects the credit risk of various counterparties

In 2016 and 2015, there were no significant transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy in the year.
